

StemEnhance®

StemEnhance is the first-ever natural Stem Cell Enhancer. It is the only nutritional supplement proven to support the natural release of adult stem cells from the bone marrow. StemEnhance consists of a patented natural 5:1 concentrate of an edible aquatic botanical known as Aphanizomenon Flos-aquae (AFA) that contains two proprietary components, Mobilin™ and Migratose®.

What StemEnhance Does:

As shown in a double-blind placebo controlled crossover study published in the peer-reviewed journal, Cardiovascular Revascularization Medicine (July-Sept 2007), 2 capsules of StemEnhance supports the natural release of stem cells from the bone marrow, increasing the number of circulating stem cells by an average of 25%. (Equivalent to about 3 to 4 million new stem cells in circulation.)

Potential Users

StemEnhance is safely enjoyed by men, women and children. It is highly recommended for those seeking optimal health and optimal fitness and performance.

FEATURES	BENEFITS
Proven stem cell enhancer	Supports the natural release of adult stem cells from the bone marrow, placing into circulation an average of 25% more stem cells. Equal to 3 to 4 million more circulating stem cells.
<i>Aphanizomenon Flos-aquae</i> (AFA)	100% natural botanical ingredient. AFA has been consumed for over 3 decades for its nutrient dense properties.
5:1 concentrate	Nutrient dense concentrate containing proprietary components, Mobilin™ and Migratose®.
Mobilin™	L-selectin blocker/ligand. Supports stem cell release.
Migratose®	Polysaccharide. Supports stem cell migration into tissues.

USAGE

Take 2 capsules orally, once or twice daily, with liquid.

FOR YOUR INFORMATION

Vegan 2 part capsule

No sugar, artificial colors, artificial flavors, soy, dairy,
yeast, or preservatives

Certifications: Kosher, Halal, Organic AFA

Vitamin K in StemEnhance: Like many foods,
StemEnhance contains naturally occurring vitamin K. Two
capsules have approximately 40 mcg of vitamin K (equals
about 1/2 cup of chopped broccoli).

Label statement: Consult your physician if pregnant or nursing.
(Many products carry such warnings out of an abundance
of caution rather than any known pregnancy risk. We
know of no evidence that consuming StemEnhance®
during pregnancy creates a health risk.)

Naturally occurring iodine: Unlike most algae,
Aphanizomenon flos-aquae (AFA) has only a small
amount of iodine, 0.39 mcg per gram. In comparison, one
slice of bread has about 6 mcg.

PEA: StemEnhance contains a naturally occurring
compound known as Phenylethylamine (PEA). PEA is
naturally produced by the brain and known to support
mood and mental energy. PEA is made by the brain
whenever one feels content and happy; it has been
described as the "molecule of joy".

modulation of affect: therapeutic and diagnostic
implications. J Neuropsychiatry Clin Neurosci 7(1): 6-14.

FAQ'S

How does an increase in the number of circulating adult stem cells lead to optimal health?

Stem cells form the core of body's natural renewal system. When circulating, adult stem cells are signaled by organs and tissues in need. They migrate into the tissue, reproduce and transform themselves into healthy cells of that tissue.

How is StemEnhance® different from whole AFA?

StemEnhance is a patented 5:1 concentrate of AFA that concentrates the beneficial organic compounds found in whole AFA, including Mobilin™ and Migratose®. StemEnhance® is scientifically proven to support an average 25% increase in the number of naturally released circulating adult stem cells.

Does StemEnhance help with any specific health condition?

StemEnhance is a nutritional supplement, not a medication. It is not intended to be used to diagnose or treat any disease or illness. Results of scientific studies indicate that increasing the number of circulating adult stem cells is a key factor in maintaining optimal health.

Can a person of any age take StemEnhance?

Yes, just follow the directions on the label and do so under adult supervision.
